DOCUMENT 1: INSTRUCTIONS TO PROPOSERS

1. INTRODUCTION

This document contains the information, requirement, and technical specification gathered and developed for this project. The content of the document is written with the intent of serving as the basis for the Request for Information (RFI) which aims to gather information from participated suppliers, vendors, or service providers as the early stages of a procurement process.

These instructions are designed to ensure that all proposals are given equal and fair consideration.

It is essential that you provide all the information asked for in the format and order specified in paragraph 16 of Document 1 to ensure compliance with all deliverables of the proposal and failure to do so may invalidate your proposal.

2. BACKGROUND

AWJ Holding Company ('AWJ') was established in 2016 in Riyadh, focusing on the planning and execution of the company's real estate assets and land bank portfolio in Saudi Arabia line with its strategic objectives, growth and expansion plans, and available resources. The portfolio consists of three business operating verticals namely leased lands, managed properties, and land bank. AHC seeks to enhance the value of the owned assets and maximize their sustainable returns.

For more information on AWJ, please visit our website: www.awjholding.com

3. TIMETABLE

All proposals must be received no later than 27th November 2025. Proposals received after this time will not be accepted. Proposals delivered to AWJ other than those specified below will not constitute a receipt. It is the Proposer's sole responsibility to ensure that proposals are received by the specified time.

Milestones	Due Date
Request for Information (RFP) Sent Out to Proposers	13 th November 2025
Proposers Acknowledge Receipt and confirm their intention to participate in the Procurement Department.	17 th November 2025
Questions and Answers Session	22 nd November 2025
Proposal Submission Due Date	27 th November 2025
RFP Review and Evaluation Period	30 th November 2025
Proposal Presentation Dates (subject to invitation and only if required)	TBA

4. LANGUAGE

The proposal, and all correspondence and documents relating to the proposal which are exchanged between the Proposer and AWJ shall be written in the English language. Any printed literature furnished by the Proposer which is in another language must be accompanied by an English translation and for the purposes of interpretation of the proposal, the English translation shall prevail.

5. OWNERSHIP OF RFI DOCUMENTS

The Request for information documents shall remain the property of AWJ. The documents and all related information provided to the Proposers are solely for the Proposer's use in preparing a proposal. AWJ reserves the right to request any disqualified or unsuccessful Proposer to return all documents and information related to the RFP to AWJ.

AWJ reserves the right to submit any part of the proposal to its consultants for technical assessment and evaluation.

6. CONFIDENTIALITY OF PROPOSALS

All documents, specifications and other such information provided to the Proposer by AWJ in relation to the RFI shall be treated as CONFIDENTIAL.

7. RESPONSE TO PROPOSERS' QUESTIONS

Answers to all the questions contained in all the clarification letters will be provided as soon as possible. AWJ aims to answer all clarifications within three working days, without identifying the Proposer who asked for the clarification. All relevant questions and answers will be given to all Proposers* and will be sent by email addresses provided. AWJ will not assume any responsibility.

*This will not be applied to a particular proposer's innovative approach to delivering the Services.

8. PRICING AND CURRENCY OF PROPOSAL

For the purposes of submitting Pricing Information Proposers should quote in KSA Riyals.

9. SUFFICIENCY OF PROPOSAL

The Proposer is responsible for carefully examining all RFI documents including all updates or revisions made or announced by AWJ prior to the deadline for submission of Proposals to ensure that the information provided is adequate and clearly understood and that all RFI documents have been received.

The Proposer shall make its own interpretation of all information provided in this RFI and shall obtain and verify all necessary data and information including informing itself with respect to all conditions which might in any way affect the cost or the performance of the services. No relief or consideration will be given for errors and/or omissions contained in this RFI.

10. CONCLUSIONS

The information presented in this RFP is furnished solely for the purpose of assisting Proposers in making their own evaluation of the project and does not purport to be all-inclusive or to contain all the information that Proposers may require. Proposers should make their own investigations, projections and conclusions and consult their own advisers to verify independently the information contained in this RFI, and to obtain any additional information that they may require, prior to submitting a Proposal. No member of AWJ or any of their respective advisors and consultants makes any representation or warranty as to the completeness of this RFI nor have they any liability for any representations (express or implied) contained in, or omissions from, this RFI.

Whilst every endeavour has been made to give Proposers an accurate description of AWJ's requirement, Proposers should form their own conclusions about the methods and resources needed to meet those requirements.

11. COMPANY INFORMATION

The Proposer must provide in its proposal full details of its main office address and telephone, and fax details and the name and details of who to contact in respect of the proposal.

If the Proposer is a subsidiary or a division, state the name and address of the parent Company. State the type of company or organization (corporation, partnership, joint venture, etc).

Please provide details of the Country of Registration, Date of Registration or Incorporation and the Issuing Authority and any other information relevant to the incorporation or the legal standing of the Proposer. If the Proposer is registered in Riyadh or the KSA, provide copies of the following:

1. Commercial Licences and registration with the Riyadh Chamber of Commerce
2. Certificate of the Zakat and Income Tax Authority (ZATCA)
3. Certificate of the General Organization for Social Insurance (GOSI)
4. Membership certificate of the Chamber of Commerce in Riyadh.
5. Foreign investment license (for foreign Proposers registered in Saudi Arabia)
6. Certificate of job nationalization (Saudization) with at least Green Nitaqat status.

If the Proposer is an association of two or more companies (corporation, partnership or joint venture, etc), you must provide details:

- A. state the same information for each of the member companies.
- B. include in the proposal a legally binding copy of the association agreement including the names of the partner companies and stating the responsible portion of the proposed Agreement for each party.
- C. A copy of an agreement signed by all member companies and duly notarized appointing one of the members as the Contractor for the Agreement and authorizing that member to act on behalf of and to legally bind all members of the association in connection with the proposal and any Agreement arising there from.

All the above required documents must be valid. Failure to provide the information in the Proposal shall be grounds for disqualification of the Proposer.

12. STATEMENT OF COMPLIANCE

Proposers shall be required to comply with the terms and conditions as set out in this RFI and information as mentioned in engagement letter to be signed with successful vendor. This will consider the provision of all the required information as specified in this RFP.

Proposers should also confirm their compliance with the requirements of the RFI and identify any points of non-compliance in the proposal specifically.

13. OTHER RELEVANT INFORMATION

Proposers are invited to provide any other relevant information which they may wish to include in support of their proposal, or which substantiates any aspect contained elsewhere within their proposal. For example, previous experience gained on other relevant contracts, company profile, Governmental support, etc.

14. SIGNING OF PROPOSALS

The proposers shall execute proposal submissions by affixing a company seal and by the signature of an employee of the Proposer who is fully authorized to bind the Proposer to the proposal and to any resulting agreement. Each page of the proposal, including all text, figures, diagrams, schedules, etc., shall be stamped at the bottom with the official company seal and initialed by the person authorized to bind the Contractor.

If the Proposer is a partnership, joint venture or other association of two or more companies, the Proposer shall submit satisfactory evidence of its legal status and of the agreement between the member companies. In this case the partnership joint venture or association shall appoint one of the member companies as Prime contractor (referred to as the Contractor in the Form of Agreement) and propose the remaining member companies for AWJ's approval as sub-contractors related to the proposal and any resulting agreement. In this case the proposer shall provide evidence that the person signing the proposal has the authority to act on behalf of all members and to bind all members to the proposal and to any Agreement resulting from the proposal.

15. VALIDITY OF PROPOSALS

Proposers must state the validity of its proposal, i.e., the period during which AWJ's acceptance shall become and remain binding and shall be a minimum of 90 days from posting.

Failure to Comply with the Above Conditions May Disqualify Your Proposal.

16. FORMAT OF PROPOSALS:

Proposers must present their proposals in the following format:

Covering Letter	Executive Summary (1-2 Pages)
Section 1	Table of Contents
Section 2	Company Information (as per Paragraph 11)
Section 3	Statement of Compliance (as per Paragraph 12)
Section 4	No Conflict-of-Interest Statement (as per Paragraph 22)
Section 5	Technical proposal (as per Paragraph 21)
Section 6	Commercial Proposal (as per Paragraph 21)

17. DELIVERY AND FORM OF PROPOSAL

Financial proposal shall be submitted separately. The proposal shall be clearly marked "FINANCIAL PROPOSAL - RFP No. 10001310" and titled "**AWJ Land Bank Platform**" to the following contacts:

The technical proposal shall not contain any parts of the financial proposal. The proposal shall be clearly marked "TECHNICAL PROPOSAL - RFP No. 10001310" and titled "**AWJ Land Bank Platform**" to the above contacts.

18. RECEIPT OF PROPOSALS

Your proposal will be received up to the time and date stated. Please ensure that your proposal is delivered no later than the appointed time. It is the responsibility of the Proposer to ensure that their proposal is delivered not later than the appointed time. AWJ does not undertake to consider proposals received after that time unless clear evidence of posting is available (i.e., clear postmark and/or certificate of posting, etc.) demonstrating that the proposal was dispatched in good time.

19. AWJ's RIGHTS & ACCEPTANCE OF PROPOSALS

This RFI is merely a request to formulate an offer to AWJ to provide the specified Services if you wish to do so. By issuing this invitation, AWJ is not bound in any way and does not have to accept the lowest proposal or any at all, and reserves the right to accept a portion of any proposal unless the proposer expressly stipulates otherwise in their proposal. AWJ may re-issue this RFP; postpone or cancel at any time this RFI process. Unsolicited responses will not be accepted.

20. REJECTION OF PROPOSALS

AWJ may, at its sole discretion, reject a proposal for any reason (or for no reason), including, but not limited to, the following:

- A. If the proposal is non-responsive to the RFI by failing to comply with the terms and conditions set out in this RFP.
- B. If the Proposer includes any terms or conditions unacceptable to AWJ.
- C. If the Proposer includes any offer to conditionally or automatically discount, reduce or modify his proposal.
- D. If there is a conflict of interest arising from the Proposer's participation in this RFI process, award of the agreement, or delivery of the Services.

21. EVALUATION CRITERIA

The proposal process will be conducted in a manner that ensures all proposals are evaluated fairly to ascertain the most economically advantageous proposal. Your response to each of AWJ's requirements will be evaluated under the following headings (please note that the order in which the criteria are listed does not imply relative importance, any elaboration is illustrative only and it is not an exhaustive list): -

A. Technical Evaluation Criteria and Weighting:

Following are the criteria that will be utilized by Awj to assess the proposals from vendors.

SL	Criteria	Weighting (%)
1	Supplier Experience and Expertise	15%
2	Delivery and Implementations	25%
3	Project and Quality Management	15%
4	Resources and Support	15%
5	Commercial Evaluation (Refer below)	30%

Note: The minimum passing score of the technical evaluation is 40% with overall 70% out of 100%

B. Commercial Evaluation Criteria:

Proposers shall submit their Financial Proposal Summary and detailed breakdown of cost and expected detailed of all delivered work and deliverables.

22. CONFLICT OF INTEREST

Proposers shall submit a no conflict-of-interest statement arising from participation in this RFP, eventual agreement, or delivery of the Services. If there exists any potential conflict of interest of a Proposer, its officers, associates and/or affiliates, including having known interests in other Proposer(s), or in AWJ or in any of its affiliates, must be detailed to the attention and full discretion of AWJ.

Moreover, if the Proposer has a vested interest (associate, affiliates, or consortium) in another Proposer or has assisted in developing a different Proposal for this RFP, then, the Proposer should clearly state it in the same statement.

23. INTELLECTUAL PROPERTY

Nothing contained in this RFI shall be construed as conferring by implication, estoppels or otherwise any license or right under any patent, whether the use of any information herein necessarily employs an invention of any existing or later issued patent.

24. DISCLAIMER

Nothing in this RFI document shall be construed as commitment by AWJ. AWJ assumes no responsibility or makes no warranties for any errors that may appear in this document and disclaims any implied warranty of merchantability or fitness for a particular purpose.

25. Submission

The proposals submission should be via FORSAH Platform.

26. Current System Analysis:

- Description of the current system and its limitations:

As of the current AWJ situation, we are in the transformation stage for all current business domains and one of the leading area is AWJ land bank which currently running out of any automation manually to record and process all designated data.

In summary, currently AWJ Holding has collection of manual data been distributed among various team which include 5000 + asset which need to be migrated in to one hub and build all the daily processes system.

- Reasons for Land bank Platform system.

- Organizational Transformation
- Inability to scale with the business
- Manual data processing and resources.
- Growth and Expansion Challenges
- Limited visibility and decision-making
- Inability to leverage data and analytics
- Difficulty in scaling and adapting.
- Business Process Automation

27. Scope of Work

AWJ Holding Company intends to have a full functional land bank platform to hold all the current company real estate assets which are serving core business domains that will be employed as critical part into AWJ Digital transformation journey **with 8-12 Months of project delivery** which also have huge impact to streamline our business processes, improve operational efficiency, and provide real-time information for decision-making. The project includes 4 major phases as the below described below:

- 1- Phase1 – AWJ Land Bank (Data Structure and Migration)
- 2- Phase2 – AWJ Land Bank (Business Process Automation -1)
- 3- Phase3 - AWJ Land Bank (Business Process Automation – 2)
- 4- Phase4 – AWJ Land Bank (Hyper Care and Support)

Within each phase delivery and completion, need to handover the full solution in the production and development to the AWJ internal technical team after deployment and within the production go live, the master expected handover checklist will be detailed in the below sections.

28. Implementation Roadmap

This implementation is a strategic initiative that will significantly enhance the efficiency and effectiveness of business operations at AWJ holding and its subsidiaries, so looking to have a well-defined strategy and implementation roadmap that will be critical to ensure the successful deployment and adoption of the platform. The supplier needs to detail the key components and phases of the strategy and implementation roadmap using his proposed technology stack or solution technology covering the above mentioned Phases with its business domains.

27.1 Implementation Phases and Core Roadmap:

The objective of this stream is to provide a roadmap for the full solution of AWJ land bank Platform aspects roadmap along with support guidance for AWJ land bank holding company.

In addition, to have a full implementation plan including migration, functional and technical aspects and as part of the project scope, the successful bidder is expected to align with AWJ Holding Company's best practices through the delivery of the following.

Wirth the below high level of delivery practise that will in detailed shown the Platform Operation & Build Internal Capability section.

In the roadmap and implementation plan, the supplier needs to deliver below streams within its proposed details:

- Project Timeline, Delivery Methodology.
- Project Resource Allocations Plan.
- AWJ Land Bank Platform Functional Requirements
- AWJ Land Bank Platform Technical Requirements
- Data Migration (Strategy and Implementation)
- Maintenance and Support Requirements

27.1.1 Project Timeline, Delivery Methodology:

The bidder must ensure the end-to-end implementation of the AWJ Land Bank Platform within the **duration of 4-8 Months** employing the **Agile delivery practices** that matching AWJ digital and Technology department delivery approach, including all the related activities that are listed below grouped by phase and the cross-phase activities, such as Project Management and Change Management.

• Mobilize	• Deploy
• Discover	• Hypercare
• Design	• Application Support
• Test	• Operational Support
• Training	• Agile Methodology Plan
• Project Tools	

A. Mobilize

The bidder must show the detailed plan for Team mobilization

- Define the project plan by workstream within a master project plan.
- Establish project standards, organization, and governance.
- Define criteria for the change request classification.
- Define roles and responsibilities for the project team.
- Establish project management, tracking, and reporting mechanisms for value delivery.
- Pre-assemble (or establish) the project environment, infrastructure, and IT systems.
- Prepare for the Discover phase.
- Local presence of Project Manager during the full project execution time at AWJ Holding Company HQ in Riyadh, Saudi Arabia.

B. Discover

- Prepare, set up, and conduct solution design workshops.

C. Design (User Experience)

- Define functional solution design.
- Finalize the functional specifications.

D. Test

The successful bidder shall provide standard functionality test suites for testing the modules. For the software, the successful bidder shall prepare the test plan and shall get it approved by AWJ HOLDING COMPANY. Test Data for different scenarios (Test Cases) will be prepared in consultation with the users concerned for testing the modules. The pre-commissioning tests shall be carried out to assess the following but not limited to:

- Conduct performance testing.
- Execute the User Acceptance Testing
- Develop comprehensive UAT cases across all the Phases, Modules and submodules.

E. Training

- Conduct project team and key-user training.
- Finalize end-user training materials, training videos, and documentation.
- Complete scheduled End-User training (No. of Key users and End users to be confirmed by AWJ Holding Company)
- The bidder shall train AWJ Holding Company personnel in the use, management, administration, maintenance, and support of each component of the solution at a level of detail sufficient to maintain the day-to-day operational capability. Documentation/manuals for any training being given to AWJ Holding Company personnel.
- The bidder shall provide Computer-based training material which may be published in AWJ Holding Company and be easily accessible by all users.
- The bidder shall obtain AWJ Holding Company approval on the dates/times of the training.
- Additional Resources - Bidder will create a library of supplemental resources including, but not limited to, videos, story maps, documents (whitepapers, articles, blogs, and

PDFs), tutorials, and teaching resources; collated from bidder websites or knowledge transfer approaches.

F. Deploy

- Finalize the solution and its supporting tools and processes for production go-live.
- Successful bidder shall submit a Deployment Plan before the rollout of the system to the Production environment.
- Successful bidder shall provide User Adoption Support and Assistance after rollout, by deputing technical and functional consultants to help users reach productivity as quickly as possible and speeding user adoption.
- The successful bidder must evolve & detail a comprehensive cutover strategy including initial data take-on, sequence of data upload, set up of support helpdesk, and helpdesk procedure to minimize the business impact of cutover activities which will be detailed in the Migration strategy.

G. Hyper Care

- Identify and document all issues encountered in the transition to the new solution.
- Support the end users during the first interaction in production.

During this phase, the successful bidder will take up the following.

- Tasks related to bug fixing (if any) in customization(s) made in the system.
- Managing recovery in case of system failure
- Minor developments, and improvements in the output and input formats
- Hand-holding the users.

Some of the other activities in this period will include but are not limited to

- Formulation of Post “Go Live” Support Strategy
- Formulating the mechanisms for Post “Go Live” Monitoring
- Carrying out the Review of issues and activities carried out during user adoption and system stabilization period.
- Monitoring and fine-tuning system response

H. Application Support

The application support activities include support activities (bug fixing, preventative maintenance), solving of service requests, minor enhancements/change requests, and 1st Level user support for the Platform.

The bidder will assume responsibility for software maintenance and error correction for AWJ HOLDING COMPANY’s AWJ land bank Platform. The bidder will take responsibility for Third-Party software.

The following activities are in the scope of this service (non-exhaustive)

- Resolve and document all application service requests, problems, and other changes in scope that require database, application code, and/or operational/process modifications because of error correction.
- Proactive Problem Management
- Conduct lessons learned reviews for repetitive error corrections and develop and implement action plans to preclude reoccurrences.
- Provide support to:

- Monitor and resolve production abnormal program terminations (Short dump or equivalent error logs)
- Correct errors or invalid data
- Rectify any other problems that may occur associated with an application and database.
- Assess and identify opportunities to reduce (or avoid) costs associated with application support and operations.

I. Operational Support

The operation support activities include running AWJ land bank Platform, creation of data, and other day-to-day activities running the application. The bidder will assume responsibility for running the application for the AWJ HOLDING COMPANY AWJ land bank Platform.

J. Project Tools

To employ the right project management tools that will support the team tracking the progress and enable well governance across project phases from the initiation till the closure by using agile methodology and comprehensive tools related to.

27.1.2 Project Resource Allocations Plan:

The successful must provide a detailed resource allocation plans that match AWJ land bank Platform project allocation plan to meet project objectives and AWJ looking to have an Effective resource management is critical to ensure the project stays on schedule, within budget, and meets all defined objectives.

The below schedule showing the details resources plan:

Team	Roles and Responsibilities	Time Commitment
Project Management Team		
Project Manager	Oversee the project, manage risks, ensure the project is on schedule and within budget.	One Full Time Allocation on Site at AWJ Office to provide dedicated oversight and coordination of the entire project.
Business Analyst	- Conduct interviews and workshops with business stakeholders to understand their business processes, pain points, and requirements. - Document the current-state business processes and identify opportunities for improvement. - Translate business requirements into functional specifications that can be used by the project team. - Create process flow diagrams and business process models to visualize	2 Business Analyst allocated as the below plan: - 2 resources - remote Module with Allocated to capture detailed requirements, facilitate workshops, and document process designs with generating all other related documentations.

	and document the as-is and to-be business processes. - Analyze the business processes to identify gaps, inefficiencies, and areas for optimization. - Collaborate with the project team to ensure the solution design aligns with the desired business processes. - Recommend and document the necessary configuration and customization requirements to bridge the identified gaps.	
Technical Team		
Solution Architect	To lead the below critical areas and design the optimal architects including the below areas: System Design that will create architectural designs and technical specifications for software solutions. Integration design and Planning that will design integration strategies for different systems and services. Develop the technical specifications for cloud hosting, infrastructure, and software components. Ensure the solution design aligns with the client's enterprise architecture and technology standards. Quality Assurance that will oversee testing to ensure compliance with performance and quality standards.	One resource remotely allocated to the project from the initiation phase till the closure phase.
Database Consultant	To define and implement the database architecture and for the whole project phases and target modules	One resource remotely allocated to the project from the initiation phase till the closure phase.
Front End and Back End Developers	Front End Developer Roles: - UI/UX Implementation to translate design mockups into responsive user interfaces. - Framework Utilization to use front-end frameworks (e.g., React, Angular) to build interactive features.	2 Front End Developers and 2 Back End Developers Resource remotely allocated to the project from the initiation phase till the closure phase.

	- Cross-Browser compatibility to Ensure the application works seamlessly across different browsers. - Performance optimization to optimize front-end performance for faster load times. - Collaboration to work closely with designers and back-end developers to integrate APIs. - Testing and debugging to conduct unit and integration testing to identify and fix issues. - To define and implement the migration activities between defined migration systems and sources across all scope and project phases. Back End Developer Roles: - Server-Side Logic to develop server-side components and APIs to support front-end functionality. - Database Management to design and manage database schemas and ensure data integrity. - Security Implementation to implement security measures to protect data and user information. - Performance Tuning to optimize server performance and scalability for high traffic. - Integration to collaborate with front-end developers to ensure seamless integration of services. - Testing and Maintenance to conduct testing and maintain code quality through regular updates and bug fixes.	
Data Migration Specialist	- Assessment and planning to evaluate existing data and create a comprehensive migration strategy. - Data Mapping to define data mapping between source and target systems to ensure accuracy. - Migration Execution that will cover execute the migration process, ensuring minimal disruption to ongoing operations. - Data cleansing to Identify and clean up data discrepancies before migration to enhance quality - Documentation that Maintains detailed documentation of migration processes, mappings, and issues encountered. - Post-Migration support after migration to resolve any issues and ensure data integrity.	One resource remotely allocated to the project from the initiation phase till the closure phase.
Testing Specialist	- Develop test scenarios and scripts to validate the system's functionality and alignment with business requirements. - Coordinate with the testing team to ensure comprehensive end-to-end testing of the business processes.	One resource remotely allocated to the project from the initiation phase till the closure phase.

	- Analyze test results and work with the project team to address any issues or defects.	
--	---	--

27.1.3 AWJ Land Bank Platform Functional Requirements

AWJ looking to have the full functional platform to serve the project phases that been briefed in the above Scope of work, so functional requirements must the supplier show in his proposal must achieve and to get a detailed view for the business / functional requirements based on the project scope:

Phase-1 AWJ Land Bank (Data Structure and completion):		
Phase 1-A: Data Sourcing, profiling and Structuring which aims to be analyze all the current data source, build data profiles, types, assessment and build full profiles within data owners / persona will be own data to be later migrate and correct/ complete in the next phase through its dedicated workflow. Phase 1-B: Data Completions and Correction phase which aim to build an automation workflow among the user persons after phase1-A completion to be handled by the data owners.	At AWJ we have many data sources which required to be fully analyzed and examined through this phase with building completion and correction automation for the business owners, so 1. Define Data Requirements • Identify Data Sources: List all sources of data that will be integrated into the platform (e.g., databases, third-party APIs). • Determine Data Types: Define the types of data to be migrated (e.g., user data, transaction records, logs). • Data Volume Assessment: Estimate the volume of data to be migrated to plan for performance and storage needs. 2. Design Data Structure • Data Modeling: Create an Entity-Relationship Diagram (ERD) to visualize data entities and their relationships. • Define Schema: Establish the data schema, including tables, fields, data types, and constraints (e.g., primary keys, foreign keys). • Normalization: Ensure the database design follows normalization principles to reduce redundancy and improve integrity. 3. Finalize Data Structure • Review Data Model: Confirm the Entity-Relationship Diagram (ERD) reflects the final schema. Validate relationships and ensure they meet business needs. • Schema Implementation: Implement the final database schema in the chosen database management system (DBMS) and create tables, define fields, and establish constraints as per the finalized design. • Indexing and Optimization: by create indexes on frequently accessed columns to improve query performance and optimize database configurations and settings for expected loads.	
Phase-2 AWJ Land Bank (Business Process Automation -1)		

The vendor shall design, configure, implement, and validate business process automations across all operational lifecycle stages, including rule-based routing, exception management, audit traceability, integration triggers, and approval hierarchy enforcement, ensuring compliance, data quality, and operational efficiency.:

- I. Sales Process
- II. Sale In Kind
- III. Update Land Information
- IV. Update Deed Ownership
- V. Update Business Ownership
- VI. Internal Ownership Update

Phase outcomes and Tasks:

Business Process Discovery & Documentation	• Conduct end-to-end business process discovery workshops • Identify current-state workflows (As-Is) • Identify future-state improvements (To-Be) • Develop Business Process Architecture framework • Process taxonomy, hierarchy, and value stream mapping
Requirements Elicitation & Gap Analysis	• Validate functional requirements by department • Collect integration & reporting needs • Identify functional gaps vs. system capabilities • Propose remediation / configuration strategies • Prioritization matrix based on value vs effort
Process Standardization & Harmonization	• Consolidate duplicate processes across subsidiaries • Standard naming conventions • Data structure alignment • Process governance standardization • Template-based workflow harmonization
Functional Design & Blueprinting	• Produce Functional Specification Document (FSD) • Business rules definition matrix • Workflow logic & decision tree definition • Validation rules and mandatory fields configuration • Process exception paths
Access Controls & Role-Based Permissions	• Define user roles & responsibilities by function • Segregation of duties (SoD) mapping • Role catalogue & authority matrix • Permissions escalation workflows
Business Process Automation	• Workflow approvals • Notifications / alerts • Conditional routing rules • SLA timers • Task escalation logic
Integration Touchpoints	• Land bank system ↔ PLATFORM (FICO / PS / MM) • GIS systems integration • CRM / Leasing system integration • Document management systems (SharePoint)

Phase3

AWJ Land Bank (Business Process Automation – 2)

The vendor shall design, configure, implement, and validate business process automations across all operational lifecycle stages, including rule-based routing, exception management, audit traceability, integration triggers, and approval hierarchy enforcement, ensuring compliance, data quality, and operational efficiency.:

- I. Add New Asset (Acquisition)
- II. Split Land
- III. Merge Land
- IV. Update Business Plan
- V. Update Valuation

Phase Outcome & and Deliverables:

Business Process Discovery & Documentation	- Conduct end-to-end business process discovery workshops - Identify current-state workflows (As-Is) - Identify future-state improvements (To-Be) - Develop Business Process Architecture framework - Process taxonomy, hierarchy, and value stream mapping
Requirements Elicitation & Gap Analysis	- Validate functional requirements by department - Collect integration & reporting needs - Identify functional gaps vs. system capabilities - Propose remediation / configuration strategies - Prioritization matrix based on value vs effort
Process Standardization & Harmonization	- Consolidate duplicate processes across subsidiaries - Standard naming conventions - Data structure alignment - Process governance standardization - Template-based workflow harmonization
Functional Design & Blueprinting	- Produce Functional Specification Document (FSD) - Business rules definition matrix - Workflow logic & decision tree definition - Validation rules and mandatory fields configuration - Process exception paths
Access Controls & Role-Based Permissions	- Define user roles & responsibilities by function - Segregation of duties (SoD) mapping - Role catalogue & authority matrix - Permissions escalation workflows
Business Process Automation	- Workflow approvals - Notifications / alerts - Conditional routing rules - SLA timers - Task escalation logic
Integration Touchpoints	- Land bank system ↔ PLATFORM (FICO / PS / MM) - GIS systems integration - CRM / Leasing system integration - Document management systems (SharePoint)

Phase4

AWJ Land Bank (Hyper Care and Support)

There is list of business process need to be captured and analyzed within this phase which focused on the below major processes phase wise:

Phase Outcome & and Deliverables:

Hypercare & Stabilization	• ☐ Functional incident triage • ☐ Defect monitoring • ☐ Process performance dashboard • ☐ SLA for fixes & enhancements • ☐ Knowledge transfer to internal support
Training & Change Enablement	• ☐ Role-based training materials (process-centric) • ☐ Standard operating procedures (SOPs) • ☐ Job aids & work instructions • ☐ Train-the-trainer programs • ☐ Change impact analysis documentation

27.1.4 AWJ Land Bank Platform Technical Requirements

System Architecture:

- Scalable and modular system architecture to support the organization's current and future growth as AWH holding and its subsidiaries that will baseline for the next strategy ECO system architecture to easy extend it or reuse it.
- Ability to deploy the AWJ land platform the cloud, or in a hybrid environment, based on the organization's IT infrastructure and deployment preferences.
- High availability, fault tolerance, and disaster recovery capabilities to ensure business continuity.
- Integration with other entPlatfromrise systems, such as Customer Relationship Management (CRM), Supply Chain Management (SCM), and Business Intelligence (BI) tools, or any Custom application such as (Internal Portals, Mobile Applications or others).

Cloud Management and Hosting Management:

AWJ Looking to adopt the new Hyperscale approach which can benefit from the scalability, reliability, and security of the leading cloud platforms, while also leveraging the deep integration and optimization of solutions. This approach can help AWJ growth and accelerate our digital transformation, reduce IT infrastructure management overhead, and focus on delivering business value through PLATFROM implementation.

- Platform should be deployed on a leading hyperscale cloud platform, such as AWS, Microsoft Azure, or Google Cloud Platform, to leverage the benefits of a scalable, reliable, and secure cloud infrastructure.
- The hyperscale cloud platform should provide a robust set of services and features for running platform workloads, including virtual machines, storage, networking, and managed database services.
- Cloud infrastructure should support high availability, disaster recovery, and business continuity features to ensure the reliability and resilience of the SAP PLATFROM system.

- The proposed hyperscale cloud platform and its services should be certified, ensuring that the infrastructure is optimized and supported for running the desired applications.
- Certification includes specific requirements for hardware, software, and configuration to meet needed performance, scalability, and security standards.

Database and Data Management:

- Support for high-performance, enterprise-grade database management systems.
- Robust data model and data architecture to handle large volumes of data and support complex business processes.
- Efficient data storage, retrieval, and management capabilities, including data partitioning, data archiving, and data compression.
- Comprehensive data security and access control mechanisms to protect sensitive information.

User Interface and Usability:

- Intuitive and user-friendly web-based interface, with support for responsive design and mobile accessibility.
- Configurable dashboards, reports, and analytics to provide real-time insights and decision support.
- Seamless integration with productivity tools, such as Microsoft Office, to enable efficient data exchange and collaboration.
- Personalization and role-based access to ensure a tailored user experience for different stakeholders.

Integration and Connectivity:

- Robust enterprise application integration (EAI) capabilities, supporting various integration patterns and protocols (e.g., web services, APIs, file transfers).
- Seamless integration with other enterprise systems, both within the SAP landscape and with external applications.
- Ability to handle complex data transformations, mapping, and orchestration requirements.
- Support for real-time data synchronization and event-driven integration scenarios.
- Assure data synchronization and replication for the scoped PLATFORM and other components.
- .

Customization and Extensibility:

- Flexible customization and configuration options to adapt the SAP PLATFORM system to the organization's specific business requirements.
- Support for custom development and extensions, leveraging SAP's development tools and programming languages (e.g., ABAP, Fiori, SAP Cloud Platform).
- Efficient change management and version control processes to manage customizations and upgrades.

- Mechanisms for integrating custom-built applications and third-party solutions with the system.

Security and Compliance:

- Comprehensive user authentication, authorization, and access control mechanisms to ensure secure access to the SAP PLATFROM system.
- Robust data encryption and protection measures to safeguard sensitive information.
- Audit logging, monitoring, and reporting capabilities to support compliance and governance requirements.

Performance and Scalability:

- High-performance processing capabilities to handle large transaction volumes and complex business logic.
- Ability to scale the AWJ Land Bank Platform system horizontally and vertically to accommodate future growth and changing business requirements.
- Efficient data management and optimization techniques to ensure optimal system performance.
- Comprehensive load testing and stress testing procedures to validate system performance under various load conditions.

Maintenance and Support:

- Robust system administration and maintenance tools to manage the landscape, including software updates, patches, and configuration changes.
- Comprehensive support and service level agreements vendor or implementation partner to ensure timely issue resolution and continuous system availability.
- Proactive monitoring and alerting mechanisms to identify and address potential system issues before they impact business operations.
- Effective training and knowledge transfer programs to equip the organization's IT team with the necessary skills and expertise to support AWJ Land Bank Platform.

27. Data Migration (Strategy and Implementation)

As per the current Situation, there is running systems/ Applications which required to Migrate all their data to be the AWJ land bank Platform based on the below expected engagements, so the bidder need to work across the below items:

Data Assessment and Inventory:

- Identify all the data sources that need to be migrated to the new system.
- Catalog the data elements, data volumes, data formats, and data quality for each source system.
- Assess the complexity and challenges associated with migrating the data.
- Prioritize the data based on business criticality and dependencies.

Data Mapping and Transformation:

- Map the source data elements to the target PLATFROM system's data model and structure.
- Identify any data transformations, cleansing, or enrichment required to ensure data integrity.
- Develop data transformation rules, algorithms, and scripts to automate the migration process.
- Define data validation and reconciliation checks to ensure data quality.

Data Extraction, Loading, and Validation:

- Develop the data extraction, transformation, and loading (ETL) processes for each data source.
- Implement a secure, reliable, and scalable data migration infrastructure (e.g., data integration tools, data lakes, cloud storage).
- Execute the data migration in a phased approach, starting with pilot migrations and progressing to full-scale migration.
- Perform comprehensive data validation checks to ensure the accuracy and completeness of the migrated data.

Cutover and Go-Live Support:

- Develop a detailed cutover plan and timeline for the final data migration and Go-Live.
- Establish clear communication and change management plans to inform and prepare end-users.
- Provide support and training for the end-users to ensure a smooth transition to the new PLATFROM system.
- Monitor the post-Go-Live data integrity and address any issues or discrepancies quickly.

Governance and Ongoing Support:

- Establish a data governance framework to manage the data migration process and ongoing data quality.
- Define roles and responsibilities for data stewardship, data quality monitoring, and issue resolution.
- Implement processes for managing data changes, data updates, and data archiving in the new PLATFROM system.
- Provide ongoing support and maintenance for the data migration and integration processes.

Key Activities:

Data Source Analysis:

- Identify all the data sources (e.g., legacy systems, spreadsheets, databases) that need to be migrated.
- Assess the data quality, data volumes, data formats, and data relationships for each source.
- Document the data source inventory and characteristics.

Data Mapping and Transformation Design:

- Map the source data elements to the target PLATFROM system's data model.
- Identify any data transformations, cleansing, or enrichment required.
- Define the data transformation rules, algorithms, and scripts.
- Develop the data validation and reconciliation checks.

Data Migration Pilot and Testing:

- Conduct pilot data migrations to validate the data migration processes.
- Perform end-to-end data validation and reconciliation checks.
- Refine the data migration processes based on the pilot results.
- Develop the cutover plan and timeline for the final data migration.

Data Migration Execution and Go-Live Support:

- Execute the final data migration according to the cutover plan.
- Provide end-user training and support during the Go-Live transition.
- Monitor the post-Go-Live data integrity and address any issues.

Data Governance and Ongoing Support:

- Establish the data governance framework and processes.
- Define the roles and responsibilities for data stewardship and data quality management.
- Implement the processes for managing data changes, updates, and archiving.
- Provide ongoing support and maintenance for the data migration and integration.

28. Maintenance and Support Requirements

AWJ Looking to have a dedicated team to run support SLA for both project phases implemented for 12 months as One Onsite Engineer full time at AWJ office – Riyadh with hyper mode functional domains support leads for each module releases. SLA support will cover the below main items:

Business Critical Processes:

- Identify the critical business processes supported by the SAP system and their respective downtime tolerances.
- Prioritize the maintenance and support requirements based on the impact of system disruptions on these critical processes.

Support Model and Responsibilities:

- support model one Engineer in-house IT team with hyper care team for each module after going live and stabilizing the platform.
- Propose definition of the responsibilities and service level agreements (SLAs) for each party involved in the support and maintenance of the SAP system.

Operational and Technical Support:

- Propose the Scope the operational support requirements, including incident management, problem resolution, and user support.
- Cover the technical support needs, such as system monitoring, performance tuning, backup and recovery, and system upgrades and any cloud operational efforts.

Proactive Maintenance and Preventive Activities:

- Include proactive maintenance tasks, such as regular system health checks, security updates, and performance optimization.
- Plan for preventive activities, like scheduled downtime for maintenance, to minimize the risk of unplanned disruptions

29. Expected Deliverables

The following is the list (not exhaustive) of the deliverables that are expected to be produced by the bidder for each work stream.

Deliverable	Description	Format	Owner
Stakeholder Mapping & Business Context	Identify stakeholders, pain points, business KPIs	Document	Vendor
Functional Requirements Catalog	Detailed functional, data, integration & reporting needs	BRD	Vendor
Data Dictionary & Taxonomy	Data attributes, categories, domains for land assets	Excel	Vendor
Data Governance Rules	Validation rules, ownership, lifecycle	Document	Vendor
Data Migration Strategy	Source systems, mapping, cleansing, reconciliation plan	Document	Vendor
Master Data Templates	Templates for asset types, categories, zoning	Excel	Vendor
To-Be Process Design	Hybrid workflows describing future operations	BPMN	Vendor
Functional Specification Document	Forms, rules, validations & automation logic	FSD	Vendor
Workflow Approval Matrices	Approval chains by thresholds and role	Matrix	Vendor
Role-Based Access Design	Permissions rules, SoD, user persona access	RBAC Matrix	Vendor
UI/UX Wireframes / Mock-ups	Screens, fields, validation steps	Mock-ups	Vendor
Integration Interface Catalog	Data entities, frequency, mapping	Document	Vendor
Test Strategy & Plan	Scope, cycles, KPIs, entry/exit criteria	Plan	Vendor
Test Cases (Functional)	Scenario, test steps, data sets	Test Pack	Vendor
UAT Scripts	Business-scenario oriented	Test Scenarios	Vendor
Defect Log & Severity Matrix	Criticality classifications	Log	Vendor
Regression Test Results	Ensure system stability after changes	Report	Vendor
User Acceptance Sign-Off	Formal confirmation	Certificate	Business Owner
Cut-Over Checklist	Steps for go-live switching	Checklist	Vendor
Deployment Package	Scripts & configurations	Release Pack	Vendor
Production Data Load	Validated, reconciled land data	Import Sheet	Vendor

Access & Roles Assignment	Access approval matrix applied	Access Matrix	Vendor
Go-Live Support Plan	Engagement structure & channels	Plan	Vendor
Knowledge Transfer Workshops	Technical & business orientation	Sessions	Vendor
Maintenance Schedule	Releases, patches, upgrades	Plan	Vendor

30. Detailed Requirements Appendix

Bidders should explain in the technical proposal how their proposed solution addresses the detailed requirements below for each work stream.

Land Bank Platform Implementation Detailed Requirements

ID	Requirement Description
1	Functional Requirements
1.1	AWJ Land Bank Platform
	The system should support Business Intelligence and Reporting
	The system should support Dashboards and KPIs
	The system should include Ad-hoc Reporting
	The system should include Predictive Analytics
	The system should include Data Visualization
	The system should include Embedded BI Capabilities
	The system should support EntPlatformrise Application Integration
	The system should support Web Services and APIs
	The system should support Third-party Application Integration
	The system should support Mobile and Offline Access

	The system should support User Management and Access Control
	The system should support Role-based Security
	The system should support Audit Logging and Compliance
	The system should support Backup and Disaster Recovery
	The system should support Performance Monitoring and Optimization
	The system should support Usability and User Experience
	The system should support Intuitive User Interface
	The system should support Role-based Personalization
	The system should support Contextual Help and Documentation
	The system should support Multi-device Support (Desktop, Mobile, Tablet)
	The system should support Multilingual and Multicurrency Support
1.2	Technical Architecture
	The system shall allow to store all platform data in a centralized cloud database management system.
	The system shall be able to store the digital document with versioning enabled.
	The system shall be able to store and provide valuable information to assist the stakeholders to draw actionable insights.
	The system shall be able to provide highly accurate and reliable CMS data for all relevant bodies, whether inside or outside.
	The system shall categorize each attachment uploaded through the CMS solution
	The system shall move the document to the archive stage once the full cycle completed
	The system shall allow users to upload the verified content formats
	The system shall encrypt the contents with the existing security tool AWJ HOLDING COMPANY has.
	The system shall protect the contents and storage to avoid data leakage.
	The system shall protect the backend communication between the server and the client
1.3	Process Management
	The system must allow the IT administrator to build needed correspondence workflow easily.
	The system shall identify the roles and access control on each process step with its attachment and metadata
	The system shall allow to change in the process steps without affecting the running tasks, actions, and historical events.
1.4	System Integration
	The system shall integrate with AWJ HOLDING COMPANY Active Directory list – Azure AD or SSO
	The system shall have sign-in option as Single Sign On (SSO)
	The system shall integrate with AWJ master Document management system
	The system shall integrate with the SAML email notification
	The system shall integrate with Mobile SMS notification
	The system shall integrate with Office M365
1.5	Management Information
	The system shall support reporting and dashboard feature build-in

	The system shall be able to generate the report for the existing data set of scope modules.
	The system shall support the SLA feature.
1.6	General System Requirements
	Installation & Configuration of the Platform software components – cloud-based deployment
	Development of the requested web applications and dashboard solutions
	The system must have built-in functionality to send email and SMS messages
	The system must have built-in notification functionality
	The system must be web-based so that administrators can access, add, edit, and upload data
	The system shall support a workflow management system for the users to be able to view the activities they have been assigned.
	The system shall have the ability for users to create/configure additional workflows
	The system shall produce mobile-compatible reports and dashboards.
	The system shall adopt automation workflows for repetitive tasks.
	The system shall provide Open APIs to connect to other systems
	The system shall be protected by an SSL certificate
	System admins should have changed log capture mode
	Coordinate with AWJ HOLDING COMPANY IT/IS to establish the servers and database schemas required within AWJ HOLDING COMPANY cloud provider
	The system shall follow AWJ HOLDING COMPANY themes and design standard
	CMS home page should be more attractive and user-friendly through friendly modern user interfaces matching AWJ HOLDING COMPANY UI UX practises

Bidders should explain in the technical proposal that their proposed solution addresses the above concerns.

SECTION 2: STANDARD TERMS & CONDITIONS OF RFP

1. IntPlatfromretation

In this Agreement the following words shall mean: -

"the Agreement Period"	means the time period between the date of Commencement and the date of the Agreement expiry or earlier termination.
"the Agreement Price"	means the agreed price as set out in Section 4 for the provision of the Services pursuant to the Agreement.
"Approved" or "Approval"	means the written sanction of AWJ's Representative.
"Business Day"	means a day other than a Friday or Saturday, on which banks are open for ordinary banking business in Riyadh.
"Commencement"	means the effective start of the Agreement as indicated in Section 2: Condition 2.
"Confidential Information"	means all information in the broadest sense in whatever form or medium that relates to past, present, or future research, development, and business activities of the disclosing Party and its Affiliates, and the disclosing Party and its Affiliates' systems, procedures, algorithms, and data which are related to these activities, information related to the operations, planning, control, and marketing of the business interests and Services of the disclosing Party and its Affiliates, any information which affects publicly held securities, and any other information about its business affairs and the business affairs of its Affiliates which the disclosing Party deems to be confidential and/or proprietary, which the receiving Party and its employees and agents may acquire possession of or access to by reason of its work with the disclosing Party or its Affiliates. This term shall also include all information and software belonging to third parties which was provided to the disclosing Party or its Affiliates in confidence to which the receiving Party may have access by reason of its work under this Agreement.
"the Contractor"	means the Person identified on the Form of Agreement who has undertaken to provide the Services. The expression shall also include any Approved Person to whom the benefit of the Agreement may be assigned by the Contractor and where the context so requires the Personnel, agent, sub-contractor, supplier and any other Person employed by the Contractor.
"the Fee"	means the fee payable to the Contractor in accordance with Section 4: Agreement Price and Rates.

شركة أوج القابضة
AWJ HOLDING COMPANY

"Final Certificate" or "FAC"	Acceptance	means the final acceptance certificate signed by both parties, in accordance with Appendix 2 of Section 4, to certify that the Services have been completed, inspected, and approved by both parties as a close-out to the Agreement and is set out in Section 4;
"Intellectual Property Rights"		means any copyright, patents, trade-marks, service marks design rights (whether registerable or otherwise), applications for any of the foregoing, know-how, rights protecting databases, trade or business names and other similar rights or obligations whether registerable or not in any country (including but not limited to the KSA) which exist at the date of this Agreement or which may, during the course of this Agreement, come into existence.
"Key Personnel"		means those Personnel that are by virtue of their skills, experience and qualifications and their position in the Contractor's management structure essential to the satisfactory and timely delivery of the Services.
"The Location"		means such location as AWJ shall nominate from time to time as being the principal place from which the Services are to be provided.
"Month"		means a calendar month.
"the Parties"		means the Contractor and AWJ jointly as identified in Section1: Form of Agreement.
"Performance Guarantee"	Bank	has the meaning given to it in Condition 7 of Section 4;
"Person"		shall include any individual, firm, unincorporated association or body corporate.
"Personnel"		means all Persons used by the Contractor in connection with the performance of the Services.
"the Project Manager"		means the principal member of Personnel in charge of managing the Agreement for the Contractor.
"the Project Managers"		means AWJ's Representative and the Project Manager jointly.
"Release Letter"		means the Contractor's release letter, in accordance with Appendix 3 of Section 4, issued, in accordance with Appendix 3 of Section 4, to induce AWJ to complete the Final Acceptance Certificate and release the final payment as set out in Section 4;

"the Services"	includes all work to be performed by, services to be rendered by and other obligations to be fulfilled by the Contractor as provided by and set out in Section 3 of the Agreement.
"Staff"	means Persons employed by AWJ and shall include people working part time and/or on contract.
"AWJ"	means the AWJ Holding for Business Services and shall include AWJ's Representative.
" AWJ's Data"	means all data, information, text, drawings, diagrams, images or sound embodied in any electronic or tangible medium, and which are supplied or in respect of which access is granted to the Contractor by AWJ pursuant to this Agreement, or which the Contractor is required to generate under this Agreement.
"AWJ's Premises"	means land or buildings (including temporary buildings) owned, leased or occupied by AWJ where the Services are performed.
"AWJ's Representative"	the AWJ manager in charge of day-to-day management of the Agreement for AWJ or his appointee.
"Variation"	means a properly executed variation to the Agreement in compliance with the requirements of Condition 12: Change Control and in accordance with Appendix 1 of Section 4.
"Warranty"	means the Contractor's guarantee related to goods and Services provided by him in pursuit of the Agreement. This shall not impinge on any of AWJ's statutory rights in respect of faulty merchandise nor shall it indemnify the Contractor from any AWJ or third party action founded on the Contractor's provision of goods and Services.
"Warranty Period"	means the period of time during which the Warranty shall survive that shall be no less than the Agreement Period in the event that, in respect of goods, the original manufacturer's warranty should expire during the Agreement Period.
"Work"	means any and all works including but not limited to literary, dramatic, musical or artistic works, sound recordings, films, broadcasts or cable programmes, typographical arrangements and designs, reports and software which are created from time to time during the course of this Agreement by the Contractor or by or together with others at the Contractor's request or on its behalf and where such works directly relate to or are created in respect of the performance of this Agreement or any part of it.

- 1.1 References to “the Agreement” mean this agreement. References to “Sections” and “Terms and Conditions” mean “Sections” and “Terms and Conditions” of this Agreement.
- 1.2 References in this Agreement to any statute, statutory instrument, regulation, ordinance (whether at KSA or international level) shall be interpreted as a reference to the same as amended by any subsequent variation, modification, or re-enactment.
- 1.3 Reference to the singular includes the plural and vice versa and references to any gender includes all genders where the context so requires. The headings in this Agreement shall neither be deemed to be part of the Agreement nor be taken into consideration in the interpretation of the Agreement.

2. Commencement and Continuation

- 2.1 The Contractor must Commence the Services within 15 business days of approving the engagement with the contractor.
- 2.2 The Contractor's timeliness of performance is an essential element of this Agreement.

3. Location (Where relevant)

- 3.1 Personnel shall in providing the Services normally operate at head office of AHC.
- 3.2 Personnel must operate at locations other than the Location nominated at Condition 3.1 at the reasonable direction of AWJ's Representative.

4. Hours of Working

In the event that the Services, in whole or in part, are to be undertaken on AWJ's Premises, they must be undertaken on working days as followed by AHC.

5. Safety

- 5.1 The Contractor must at all times ensure that all Services and Work is undertaken strictly in compliance with the relevant industry standards, AWJ Standing Instructions, all KSA National and Local Rules, Regulations, etc. related to health, safety and the environment, with particular attention focused on safety and shall include any subsequent amendments and additions thereto that AWJ may issue from time to time.
- 5.2 The Contractor must be familiar with the original equipment manufacturer's instructions regarding the safe operation, storage and maintenance of all equipment and tooling that will be used by him in pursuit of the Services. In the event that any such item of equipment or tooling becomes defective the Contractor must immediately withdraw it from use, place it into quarantine, and must report the incidence to AWJ's Representative as soon as is reasonably practicable.

6. Personnel

- 6.1 The Contractor must ensure that only appropriately qualified, experienced and medically fit personnel using only the highest professional standards while maintaining full

compliance with AWJ's technical standards and procedures are employed in the provision of the Services.

6.2 If AWJ notifies the Contractor that it considers that any Personnel is not appropriately qualified or trained to perform the Agreement or is not delivering the Agreement to the satisfaction of AWJ, or are absent due to sickness or injury or any other unplanned event, and in AWJ's opinion coverage is required, then the Contractor must either: -

6.2.1 as soon as is reasonably practicable, take all such steps as AWJ considers necessary to remedy the situation; or

6.2.2 if so required by AWJ, remove the Personnel from performing the Agreement or any part of it and immediately provide a suitable replacement within ten (10) Business Days at no cost to AWJ.

6.3 The Contractor must not replace any Key Personnel during the Agreement Period without the Approval of AWJ. If AWJ gives this consent the Contractor must ensure that replacements are inducted to satisfactorily manage their responsibilities in the provision of the Services.

7. Agreement Management

The Parties must each appoint its manager to be responsible for representing that Party in all matters associated with the delivery of the Services. AWJ shall appoint and install AWJ's Representative; The Contractor shall appoint and subject to AWJ's Approval, at its sole discretion, install the Project Manager, who shall each be the principal point of contact between the Parties and who shall be referred to hereinafter as "The Project Managers".

Each of the Parties must, on Agreement Commencement inform the other Party in writing of those addresses and telephone numbers where the respective Project Manager may be contacted by day and by night. The Contractor must promptly comply with all reasonable requests or directions of AWJ's Representative in respect of the Agreement. Any correspondence relating to the Agreement must quote the reference number of the Agreement.

8. Change Control

Requests for changes may be made by either Party in writing and the Project Managers will review the proposed change and determine the effect (if any) that the implementation of the change will have on price, schedule, and other Terms and Conditions of the Agreement. Any such changes and their value, once agreed shall be documented and signed by the Parties and any other necessary authorised signatory of either Party and shall, as soon as is practicable, be made the subject of a Variation that shall be signed by both Parties.

In the event the Parties cannot agree the changes requested within ten (10) Business Days of receipt of the request, AWJ may at its sole discretion, terminate the Agreement or any part of it, by immediate written notice.

9. AWJ's Data

The Contractor acknowledges that AWJ's Data are the exclusive property of AWJ and AWJ reserves all Intellectual Property Rights, which may subsist in AWJ's Data. The Contractor must not delete or remove any copyright notices contained within or relating to AWJ's Data.

10. Data Protection

The Parties must each comply with all relevant data protection principles and good practice and take reasonable precautions (having regard to the nature of their other respective obligations under this Agreement) to preserve and protect the integrity of the other Party's Data.

11. Confidential Information

The receiving Party of Confidential Information acknowledges the confidential nature of the Confidential Information and the disclosing Party's valuable proprietary interest in it.

The receiving Party and its employees and agents must treat all Confidential Information as confidential and proprietary to the disclosing Party and its Affiliates, limit access to the Confidential Information to its employees and agents working on any relevant Project and to those supervisory personnel with a legitimate need to know such information.

All information obtained or derived by the Contractor in the provision of the Service must be considered to be Confidential Information and shall not be divulged by the Contractor to any other party save AWJ. The obligations under this Condition shall continue notwithstanding the expiry or termination of the Agreement.

12. AWJ's Use of Information

There shall be no restriction on AWJ's right to use, disclose, or otherwise deal with the information, data, or services provided by the Contractor in pursuit of the Services.

13. Property

In the event of any loss or damage beyond economic repair or damage occurring to any of AWJ's property arising out of the negligence or default of the Contractor, the Contractor must, at the discretion of AWJ's Representative, be solely responsible for all replacement or repair costs incurred.

All property of the Contractor whilst on AWJ's premises shall be there at the risk of the Contractor and AWJ shall at its discretion accept no liability for any loss or damage howsoever occurring to it.

14. Termination

TERMINATION WITHOUT CAUSE

AWJ shall have the right to terminate the performance of Work under this Agreement in whole or in part if AWJ deems that such a termination may be in the interest of AWJ. In the event AWJ decides to terminate the performance of the Work or any part thereof it may do so by giving to the Contractor a 5 days' Notice of Termination specifying the extent of termination and the effective date.

After the receipt of a Notice of Termination as above, and unless otherwise directed by AWJ in writing, the Contractor shall immediately proceed with the following obligations, regardless of any delay in determining or adjusting any payments due under this condition:

- i. Stop Work as specified in the notice, and/or
- ii. Complete the performance of the Work that is not terminated; and/or,
- iii. If requested by AWJ, provide a written report stating in detail the part of the work completed up to the date of termination.

AWJ and the Contractor shall agree upon the payment to be made to the Contractor as a result of the termination specified in this RFP. In such case AWJ shall only be liable to pay the Contractor the costs incurred in completing the Works till the date of notice of termination. Other than the factually incurred costs until the end of the Agreement, NO claims for costs and/or damages of whatever type shall be payable as a result of such termination. AWJ shall not be liable to the Contractor for any loss, claims, damages, fees, liabilities, costs or expenses (whether direct, indirect, economic, financial, consequential (including without limitation loss of profit, loss of goodwill, loss of sales revenue, loss of Agreement, and loss of opportunity) or otherwise) suffered by the Contractor other than for the proportion of the price payable for the Services as relates to the work properly and satisfactorily carried out or where the Services are charged on a time basis, for the time properly and necessarily spent on the Services prior to termination.

TERMINATION WITH CAUSE

Notwithstanding the provisions above, AWJ shall have the right, to terminate this Agreement for default either in whole or in part by giving thirty (5) days written notice to the Contractor to that effect if the Contractor;

- i. Fails to perform its obligations within the times specified in this Agreement, or
- ii. Fails to make progress so as to endanger the performance of the Work under the provisions of this Agreement; or
- iii. Commits any fundamental breach to the provisions of this Agreement, or
- iv. If Contractor tries to deceive or defraud in his dealing with AWJ, or
- v. If Contractor becomes bankrupt or insolvent or commits any act that may cause him to become bankrupt or insolvent, or

- vi. If Contractor assigns the Agreement or any part thereof without the consent of AWJ for the same.

AWJ shall have the right to terminate this Agreement;

- i. If the Contractor does not cure such failure or breach within 10 Business Days; or
ii. After receipt of the notice from AWJ specifying the failure or breach

If AWJ terminates this Agreement for default in whole or in part, it shall have the right to procure, under the terms and in the manner AWJ considers appropriate, products and/or services similar to those terminated, and the Contractor shall be liable to AWJ for all excess costs for procuring those products and/or services, as well as all administrative costs incurred by AWJ in connection with the Contractor's default. However, the Contractor shall continue to perform any part of the Work, which is not terminated.

15. Liquidated Damages

If the complete Work is not delivered within the timescale specified in the Agreement, the Contractor shall be liable to pay to AWJ as liquidated damages for the delay a sum equivalent to [1%] of the total Agreement Price per week or part thereof to a maximum of 10% of the value of the Agreement. The deductions to the Fee do not in any way relieve the Contractor from any of its obligations to complete the Services or from any other of the Contractor's obligations and liabilities under this Agreement.

Without limiting any other rights AWJ may have, AWJ may deduct from the Fee any amounts payable by the Contractor to AWJ under this Agreement or recover the same as debt due from the Contractor without the need to prove any actual damage or loss.

The provisions of this Condition are without prejudice to any other rights of AWJ under the Agreement and in particular, those under this RFP: Termination, the liquidated damages payable hereunder in respect of any period of delay, which occurred during the Agreement Period, shall be paid by the Contractor.

No payment or concession to the Contractor by AWJ or any other act or omission of AWJ shall in any way affect the rights of the AWJ to recover the said liquidated damages or be deemed to be a waiver of the right of the AWJ to recover any such damages unless a waiver has been expressly stated in writing by AWJ.

16. Waiver

No delay by or omission by either Party in exercising any right, power, privilege or remedy under this Agreement shall operate to impair such right, power, privilege or remedy or be construed as a waiver of it. Any single or partial exercise of any such right, power, privilege or remedy shall not preclude any other or further exercise of it or the exercise of any other right, power, privilege or remedy.

17. Publicity

The Contractor must not:

- publish alone or in conjunction with any other party any article, photograph or other illustration relating to the Services nor any information derived from the Contractor's participation in the Agreement;
- make any reference in any advertising or other promotional material to this Contract or any of its dealings with AWJ;
- associate or in any way connect any name or trademark of AWJ with the Contractor's work or Services hereunder;
- make any indication that AWJ endorses or approves or has endorsed or approved the Contractor or its Services;

without prior reference to and the written consent of AWJ.

The obligations under this Condition shall continue notwithstanding the expiry or termination of the Agreement.

18. Presentation & Payment of Invoices

The Contractor must provide to the complete satisfaction of AWJ full, relevant and accurate information and documentation in support of its invoices.

AWJ will make no payment for activity by the Contractor that has not been Approved.

AWJ aims to pay all Approved invoices issued by the Contractor within 15 days of receipt. If any concerns relating to the issue or payment of invoices arise, the Contractor must contact AWJ's Representative. AWJ aims to reply to such concerns within ten (5) Business Days. AWJ shall not be responsible for any delay in payment caused by incomplete or illegible invoices issued by the Contractor. Invoices should be addressed to: -

The Finance Department,
AWJ Holding Company,
PO BOX 7586, Riyadh,
Kingdom of Saudi Arabia, 12341

All invoices must clearly quote the Agreement number (see page 1) and the relevant dates, location and the name of AWJ's Representative.

A final invoice must be submitted by the Contractor not later than 15 days after the date of completion of the Agreement howsoever arising. On due payment of the final invoice by AWJ all amounts due to be reimbursed under this Agreement shall be deemed to have been paid and AWJ shall have no further liability to make reimbursement of any kind. AWJ shall not be obliged to pay the final invoice until the Contractor has carried out all the elements of the Agreement to the satisfaction of AWJ.

Except where it is expressly provided that AWJ shall carry out a Contractual obligation at its own cost, all things to be supplied or performed by the Contractor under the Agreement must be deemed to be included in the rates and prices included in Section 4: the Agreement Price and Rates Section. All obligations of the Contractor shall be performed by the Contractor at its sole cost and expense.

The Contractor must include in its contracts with suppliers or sub-contractors engaged for the purposes of the Agreement a written condition undertaking to make payment for the supply of their goods and/or services by the end of the Month following the Month in which the invoice

was received by the Contractor (provided that such goods and/or services have been correctly supplied in accordance with the relevant contract).

19. Travel, Subsistence & Accommodation Costs

The Contractor shall not receive any additional payment for travel, accommodation or time spent by its Personnel engaged in travelling made necessary in the performance of the Agreement unless otherwise stated in the Agreement and previously agreed in writing by AWJ's Representative.

AWJ shall not be liable to reimburse the Personnel for any out-of-pocket expenditure, which may be incurred. If, however due to circumstances directly connected with the work, expenses are incurred then a claim for reimbursement, accompanied by all supporting documentation, may be raised with AWJ, whose decision on such claim shall be final and binding. All such claims must be issued to AWJ before the Personnel finally leaves the Location having completed their work with AWJ.

20. Audit Access and Information

The Contractor must maintain full and accurate accounts in connection with the Agreement. Such accounts must be retained for at least 3 (three) years after the end of the financial year in which the last payment was made under this Agreement.

The Contractor must provide access at all reasonable times to AWJ's auditors, internal and external, the KSA National Auditors Office, and any other duly authorised Staff or agents to examine the accounts or inspect such documents and records as AWJ considers necessary in connection with this Agreement irrespective of the location of such accounts, records or documents.

In addition, the Contractor must provide access at all reasonable times to AWJ's auditors, internal and external, and any other duly authorised Staff or agents to direct access to all of its IT equipment, documents, papers and records related to this Agreement for the purpose of conducting audits and ensuring compliance with AWJ Information Security Policy. These records include licensed software, security configuration and settings of equipment, user access rights on the equipment and any records in electronic form, including but not limited to computer hard drives, tape backups and other such storage devices.

The Contractor must provide to AWJ the right to carry out examinations at all reasonable times into the economy, efficiency and effectiveness with which the Contractor has used AWJ's resources in the delivery of the Services and where appropriate interview Personnel who shall provide full and frank answers.

The requirements of this condition shall also devolve to all and any of Contractor's subcontractors.

21. Notices

Any notices to be given under this Agreement, other than day-to-day communications within the duties of the Project Managers, must be in writing and must be delivered personally or

sent by post or by telex or by facsimile transmission to the Parties' business addresses set out in this Agreement. Any such notice shall be deemed to have been served, if delivered personally: at the time of delivery, if sent by a bona-fide courier service of good repute: 48 hours after posting, or if sent by e-mail, telex or facsimile transmission: 12 hours after proper transmission.

22. Exclusivity

The Contractor's rights under the Agreement are not exclusive and AWJ shall have the right, if it in its sole opinion deems necessary for the efficient and effective implementation of the Service, to intervene and make at any time alternative arrangements for the provision of the Service, either in part or as a whole, as may be appropriate at no cost to itself.

23. Severability

If any provision of this Agreement is determined to be unenforceable for any reason, that portion of this Agreement will be severed and the remaining provisions will continue in full force without impairment.

24. Force Majeure

Notwithstanding any other provision of this Agreement, neither Party shall be deemed to be in breach of this Agreement, or otherwise be liable to the other, for any delay in performance or of the non-performance of any of its obligations under this Agreement, if the delay or none performance is due to a Force Majeure of which it has notified the other Party.

The Force Majeure in this Condition shall only mean and be limited to fire, flood, earthquake, natural catastrophe, industrial action, civil strife, terrorist activity, declared war, and any Government action which prevents the Party primarily affected from performing its obligations.

The Party claiming to be affected by Force Majeure must bear the burden of proving that it is so affected.

The Party who is primarily affected by the Force Majeure must immediately but under no circumstances later than two (2) days after becoming aware of the Force Majeure which prevents or hinders its performance under this Agreement, notify the other Party of the existence, commencement date and nature of the Force Majeure and of the steps that are reasonably available to it and of the steps that it intends or is taking.

Any failure or delay by the Contractor in performing his obligations under the Agreement which results from any failure or delay by any sub-contractor or supplier shall be regarded as due to Force Majeure only if that sub-contractor or supplier is itself impeded in complying with an obligation to the Contractor by Force Majeure.

25. Disaster Recovery

The Contractor must, within fifteen (15) Business Days of the Commencement Date, provide AWJ with a comprehensive disaster recovery plan that shall include:

- a paper discussing all perceived risks and the Contractor's prescription for the elimination

of, or recovery from, each to enable a seamless continuity of the Services.

- the Contractor's proposals for the protection of data essential to the delivery of the Services.

26. Environmental Protection

The Contractor must ensure that nothing to be supplied or used under the Agreement shall contain any substance controlled under the Laws of the KSA. Failure by the Contractor to comply with this Condition shall be regarded as a breach for which AWJ reserves the right to terminate the Agreement.

27. Information Security Compliance for Future Use

The Contractor must comply with AWJ's Information Security Management System (ISMS), Information Security Policies and follow AWJ's Security Procedures, Standards and Guidelines. AWJ's ISMS is based on ISO 27001 requirements and its objective is to ensure that the confidentiality, integrity and availability of AWJ information and assets are appropriately protected.

A copy of AWJ's Information Security Policy is available on AWJ's website: www.awjholding.com

28. Dispute, Law and Jurisdiction

This Agreement shall in all respects be construed and governed by the Laws of the KSA as applied by the Courts of Riyadh.

The parties shall exert every effort to resolve amicably by direct informal negotiation any disagreement or dispute arising between them out of or in connection with this Agreement.

Any dispute arising out of or in connection with this Agreement, which cannot be resolved amicably by way of direct informal negotiation within ten (10) days of the dispute having arisen, shall be referred to sole jurisdiction of the Courts of Riyadh.

SECTION 3: AGREEMENT PRICE & RATES SECTION

1. Fixed Prices and Rates

The Agreement price and rates set out in this Section shall be fixed for the Agreement Period and constitute the entire sums which Contractor may invoice against unless changed by the issue of a properly completed Variation. No other indications or understandings will create an obligation on AWJ to remunerate the Contractor over and above the Agreement Price and rates.

2. Agreement Price and Currency

The Agreement Price shall be **SAR (KSA Riyals)** and shall be paid by AWJ to the Contractor in SAR.

3. Rates & Rate Payment Start Date

The Agreement Price shall be fully inclusive of salary, bonus, all overtime, all insurances medical expenses, overheads, profit, allowances, full messing and accommodation facilities in Riyadh, airfares, mobilization and demobilization costs, travel expenses, transportation within Riyadh to AWJ offices, taxes, duties, dues and levies accommodation and messing charges whilst in transit from home address to Riyadh and return and any other like costs or expenses associated in the provision of the Services.

4. Payment Schedule

The payment schedule shall be agreed with the contractor based on mutual consent.
