1. Company Overview

Company Name: CognitBotz

Industry: AI Automation & Intelligent Process Automation

Founded: 2019

Headquarters: Hyderabad, India

AI Automation Partner

Mission Statement: Empower Your Business with Agentic AI and Intelligent Automation

CognitBotz provides cutting-edge Intelligent Process Automation, Agentic AI, and custom AI solutions to streamline workflows and drive growth.

Key Offerings

- Enterprise-grade security
- Rapid ROI
- End-to-end automation

Core Competencies

- **Enterprise-grade Security:** Best practices across auth, data, and governance
- **Rapid ROI:** Iterative delivery with measurable outcomes in weeks
- **Scalable Architecture:** From POC to production with reliability built-in
- **Domain Expertise:** Healthcare, Finance, Manufacturing, and more

Technology Partnerships

Powering Automation with Leading Technology Partners

Modern Agentic AI on Azure

- **Azure AI & OpenAI:** GPT-4 family, embeddings, and vision with Azure security
- **Copilot & Studio:** Build organization-specific copilots and plugins for M365
- **Azure AI Foundry:** Prompt flows, evals, safety, and observability
- **Semantic Kernel:** Plan and orchestrate agent workflows with skills
- **Azure ML & Prompt Flow:** Train, evaluate, and deploy with governance
- **Enterprise-Grade:** Security, compliance, auditability by design

How Agentic AI on Azure Works

A guided journey from discovery to measurable outcomes using Azure AI, Copilot, and orchestration frameworks:

1. **Discover & Align:** Identify high-impact use cases and align with business goals
2. **Design Copilots & Agents:** Blueprint domain copilots and agentic workflows
3. **Build on Azure AI:** Leverage Azure OpenAI, Foundry, and Semantic Kernel for orchestration
4. **Compose & Integrate:** Connect data and tools via Prompt Flow, Graph, and Power Platform
5. **Deploy with Governance:** Ship safely with evaluations, safety filters, and observability
6. **Optimize & Scale:** Measure outcomes, iterate prompts/skills, and scale adoption

Products of CognitBotz

Docapture AI

Docapture AI automates document capture, extraction, and processing with advanced artificial intelligence, streamlining business workflows.

Skill Matrix AI

Skill Matrix AI is AI-powered HR automation software for analyzing, mapping, and optimizing employee skills and workforce planning.

Intelligent AI

Intelligent AI is an AI Agent marketplace, delivering intelligent automation solutions and digital transformation.

Measurable Impact Through AI & Automation

Our intelligent automation and agentic AI solutions deliver transformative improvements in efficiency, accuracy, cost savings, and overall business performance.

Key Metrics

- **Accuracy Rate:** Industry-leading precision
- **Time Saved:** Significant reduction in process time
- **Projects Completed:** Extensive portfolio

- **Cost Reduction:** Substantial savings achieved

CognitBotz empowers businesses to achieve tangible results. Our clients consistently report significant ROI, enhanced productivity, and a stronger competitive edge by leveraging our advanced AI and automation capabilities.

2. Our Intelligent Automation Services

Driving business transformation with AI-powered automation, agentic solutions, and expert services.

Works with Microsoft Azure - Explore Microsoft Agentic AI

Service Portfolio

Agentic AI & AI Agents (Microsoft-first)

Design, deploy, and scale AI agents orchestrated on Microsoft Azure: Azure AI, Azure AI Foundry, Copilot, Azure OpenAI, and Semantic Kernel—plus multi-framework support.

- Copilot and Azure OpenAI-powered workflows
- Azure AI Foundry projects with governance
- Semantic Kernel & Prompt Flow orchestration
- Multi-agent patterns (AutoGen, CrewAI, LangChain)

Intelligent Automation Solutions Development

End-to-end intelligent automation leveraging RPA, AI, and ML. We prioritize Azure-native services where possible while integrating best-in-class tools as needed.

- Reduce operational costs by up to 40-60%
- Improve process efficiency and accuracy significantly
- Free up human resources for higher-value strategic tasks
- Enhance customer and employee experience through faster processing

Intelligent Document Processing (IDP)

Automate data extraction, classification, and validation from various document types (invoices, contracts, forms) using AI and OCR technologies to streamline document-heavy processes.

- Reduce manual data entry by up to 90%
- Improve data accuracy and consistency
- Accelerate document processing cycle times
- Seamless integration with existing enterprise systems

Dedicated Developers & AI Engineers

Access our pool of skilled RPA developers, AI engineers, and automation specialists. We provide dedicated resources proficient in UiPath, Automation Anywhere, Blue Prism, Microsoft Power Automate, Python, and various AI frameworks.

- Flexible engagement models (short-term, long-term)
- Rapid team augmentation and project scalability
- Expertise in leading RPA and AI/ML technologies
- Seamless integration with your existing teams and workflows

Custom AI & Automation Solutions

We design and build bespoke AI and automation solutions, with strong Microsoft Azure alignment (Azure OpenAI, Cognitive Services, Azure ML) alongside best-of-breed frameworks.

- Solutions for predictive analytics, natural language processing, computer vision, etc.
- Development of custom machine learning models
- Integration of AI capabilities into existing applications

- Proof-of-concepts and pilot programs to validate solutions

Process Analytics & Discovery

Utilize process mining, task mining, and advanced analytics to gain deep insights into your existing workflows, identify automation opportunities, and measure the impact of implemented solutions.

- Data-driven identification of bottlenecks and inefficiencies
- Quantifiable insights for automation prioritization
- Continuous monitoring and optimization of automated processes
- ROI calculation and performance dashboards

Corporate Training & CoE Setup

Empower your workforce with our comprehensive corporate training programs. We help you establish an Automation Center of Excellence (CoE) to foster a culture of innovation and drive your automation journey internally.

- Customized training modules for various skill levels
- Hands-on workshops and real-world use cases
- Best practices for RPA and AI implementation and governance
- Guidance on building and scaling an internal CoE

Copilot Use Cases

- **Sales & Service Copilots:** Summarize meetings, draft responses, and auto-log actions in CRM

- **Knowledge & Support:** Answer internal FAQs, search docs, and route tickets across channels
- **Developer Productivity:** Generate boilerplate, review code, and document systems securely
- **Analytics Copilots:** Natural language to insights in Fabric/Power BI with governance

Microsoft Agentic AI Capabilities

We prioritize Microsoft Azure for enterprise agentic AI—combining Azure AI Foundry, Copilot, Azure OpenAI, and Semantic Kernel with robust security and governance.

- **Azure AI & Azure OpenAI:** GPT-4 family, embeddings, and vision with Azure security, regionality, and compliance
- **Azure AI Foundry:** Full lifecycle for prompt flows, evaluations, safety, and observability across AI apps
- **Copilot & Copilot Studio:** Build organization-specific copilots, connectors, and plugins integrated with Microsoft 365
- **Semantic Kernel:** Plan, orchestrate, and compose agent workflows with skills and connectors
- **Azure ML & Prompt Flow:** Train, evaluate, and deploy models; orchestrate prompts and tools with governance
- **Data & Integration:** Fabric, Synapse, Power Platform, Graph APIs, and enterprise connectors

Agentic AI Frameworks & Tools

Microsoft-first, with flexibility to use the right tool for the job:

- Microsoft (Azure AI, Foundry, Copilot)

- Semantic Kernel
- LangChain
- LlamaIndex
- AutoGen
- CrewAI
- OpenAI
- Anthropic
- Hugging Face
- Vertex AI
- Bedrock

Agentic Tooling Showcase

Microsoft (Azure): Azure AI, Foundry, Copilot, OpenAI, Semantic Kernel, Prompt Flow

3. Industry-Specific Solutions

Agentic AI & Automation Solutions for Every Industry

Tailored agentic AI and automation on Microsoft Azure help healthcare, finance, manufacturing, insurance, and logistics teams optimize processes, unlock new capabilities, reduce costs, and improve efficiency.

Industry Journeys

A guided path to value realization across healthcare, finance, manufacturing, insurance, and logistics.

Healthcare: Intake to Insights

Automate intake, triage, and clinical documentation with agentic copilots.

Finance: KYC to Reporting

Accelerate KYC, underwriting, and regulatory reporting with Azure AI.

Manufacturing: QA to Maintenance

Computer vision for QA and AI agents for predictive maintenance.

Insurance: FNOL to Claims

Automate FNOL, policy admin, and claims adjudication with copilots.

Logistics: Order to Delivery

Optimize order processing, routing, and tracking via agentic workflows.

Our AI-Powered Solution Portfolio

Robotic Process Automation

Automate repetitive tasks and processes to free up human resources for higher-value activities.

Intelligent Document Processing

Extract, classify, and process data from various document formats using AI and machine learning.

Process Analytics

Gain insights into your processes to identify bottlenecks and opportunities for optimization.

Agentic AI & Cognitive Automation

Leverage intelligent agents and cognitive technologies (NLP, Computer Vision, ML) to handle complex, judgment-based processes and create adaptive systems.

Custom AI & Automation Solutions

Tailored automation solutions designed to address your specific business challenges.

End-to-End Process Automation

Comprehensive automation of entire business processes from start to finish.

Solutions by Industry

We understand the unique challenges of different industries and offer specialized solutions.

Healthcare

- Patient data management automation
- Claims processing optimization
- Appointment scheduling automation

Finance

- Account reconciliation automation
- KYC process optimization
- Fraud detection and prevention

Manufacturing

- Supply chain optimization
- Quality control automation
- Inventory management

Insurance

- Claims processing automation
- Policy administration
- Underwriting process optimization

Banking

- Customer onboarding automation
- Loan processing optimization
- Compliance reporting

Logistics

- Order processing automation
- Shipment tracking optimization
- Warehouse management

4. About CognitBotz

Pioneering the future of business with intelligent automation and AI-driven solutions.

Our Story

CognitBotz Solutions was established in 2019 in Hyderabad, India, with a vision to revolutionize how businesses operate through intelligent automation.

Since our inception, we've expanded globally with offices in Malaysia, USA, and Canada, serving clients across healthcare, finance, manufacturing, insurance, banking, and logistics sectors.

Our team comprises AI and automation experts, including seasoned consultants, developers, data scientists, and business analysts who work collaboratively to deliver cutting-edge intelligent automation and agentic AI solutions that drive efficiency and growth.

Our Mission & Vision

Guiding principles that drive our commitment to excellence in automation

Our Mission

To empower organizations with intelligent automation solutions and agentic AI solutions that enhance operational efficiency, reduce costs, foster innovation, and enable sustainable growth. We are committed to delivering transformative technology that creates lasting value for our clients.

Our Vision

To be the global leader in intelligent automation and agentic AI, recognized for our expertise, innovation, and commitment to excellence. We envision a future where businesses across

industries leverage our solutions to achieve unprecedented levels of efficiency, agility, and competitive advantage through human-AI collaboration.

Our Core Values

The principles that guide our actions and define our company culture

- **Innovation:** We continuously explore new technologies and approaches to deliver cutting-edge automation solutions.
- **Excellence:** We are committed to delivering the highest quality solutions that exceed client expectations.
- **Integrity:** We operate with transparency, honesty, and ethical standards in all our business dealings.
- **Collaboration:** We believe in the power of teamwork and partnership to achieve exceptional results.

Why Partner with CognitBotz?

We combine deep industry expertise with cutting-edge technology to deliver solutions that truly make a difference.

- **Innovative Solutions:** Leveraging the latest in AI and automation to solve complex business problems.
- **Expert Team:** A dedicated team of certified professionals passionate about automation.
- **Proven Results:** A track record of delivering measurable improvements and significant ROI for our clients.
- **Agile Delivery:** Flexible and adaptive approach to ensure rapid deployment and value realization.

- **Client-Centric Focus:** Tailoring solutions to meet your unique needs and strategic objectives.
- **Global Expertise:** Bringing international best practices and insights to your local context.

Our Journey - Key Milestones

- **2019 - Company Founded:** CognitBotz Solutions was established in Hyderabad, India
- **2020 - First Major Client:** Secured our first enterprise client in the healthcare sector
- **2021 - International Expansion:** Opened our first international office in Malaysia
- **2022 - North American Presence:** Established offices in the USA and Canada to serve North American clients
- **2023 - Strategic Partnerships:** Formed strategic partnerships with leading technology providers
- **2024 - Continued Growth:** Expanded our team and service offerings to meet growing demand
- **2025 - Expanded to Agentic AI:** Pioneered new frontiers by expanding our journey into Agentic AI solutions and advanced AI-driven automation

Our Technology Partners

We collaborate with leading technology providers to bring you the best-in-class automation solutions.

5. Our Leadership Team

Meet the experienced leaders driving CognitBotz's mission to revolutionize industries with AI and automation.

Meet Our Core Team

Our leadership team brings decades of collective experience in automation, artificial intelligence, and business transformation, dedicated to your success.

Vinay Reddy - Founder & CEO

Strategic Advisor on Intelligent Automation • RPA CoE Mentor

As the Founder and CEO, Vinay is the driving force behind CognitBotz. With deep expertise as a Strategic Advisor on Intelligent Automation and an RPA CoE Mentor, he guides the company's vision and ensures clients receive transformative, high-impact solutions that redefine operational efficiency.

Syed Pasha - Head of Global Delivery

4x UiPath MVP • Corporate Trainer

Syed leads our global delivery, ensuring excellence and consistency across all projects. A 5-time UiPath MVP, Certified Solution Architect, and Corporate Trainer, his unparalleled technical expertise and commitment to quality guarantee that our clients' automation goals are not just met, but exceeded.

Venkat Reddy - Global Delivery Manager

Venkat is at the forefront of building and nurturing our client partnerships. He excels at understanding unique business challenges and aligning them with CognitBotz's strategic solutions, driving growth and ensuring long-term client success and satisfaction.

Our Culture

Innovation, Collaboration, Excellence

At CognitBotz, we foster a dynamic culture of innovation, collaboration, and continuous learning. Our team is passionate about pushing the boundaries of automation and AI to deliver exceptional value to our clients.

Our core values drive us:

- Client-centric approach to every solution
- Pioneering new frontiers in AI and automation
- Empowering our team to achieve their best
- Unwavering commitment to quality and integrity

Careers

Shape the Future of Automation

We're always seeking talented individuals passionate about AI, automation, and technology to join our innovative and growing team.

Explore opportunities in:

- RPA & AI Development
- Solution Architecture

- 
- Data Science & Machine Learning
 - Business Analysis & Consulting

6. Success Stories

Real-world examples of how our automation solutions have transformed businesses across industries.

Healthcare Industry - Leading Healthcare Provider

A major healthcare provider was struggling with manual patient data entry, leading to delays in patient onboarding and increased administrative costs.

Our solution included:

- Automated patient data extraction from various document formats
- Integration with existing electronic health record (EHR) system
- Automated verification and validation of patient information
- Real-time reporting and analytics dashboard

Results Achieved:

- **Time Saved:** 70%
- **Accuracy:** 99.8%
- **Cost Reduction:** 45%

"CognitBotz's automation solution has transformed our patient onboarding process, significantly reducing processing time and improving data accuracy. Our staff can now focus on providing better patient care instead of administrative tasks."

- Chief Information Officer

Financial Services - Global Financial Institution

A leading financial services firm was facing challenges with their account reconciliation process, which was time-consuming, error-prone, and required significant manual effort.

Our solution included:

- End-to-end automation of the reconciliation process
- Intelligent exception handling and resolution
- Automated reporting and compliance documentation
- Integration with existing financial systems

Results Achieved:

- **Hours Saved:** 120+/month
- **Accuracy:** 99.5%
- **ROI:** 310%

"The automation solution implemented by CognitBotz has not only saved us significant time and resources but has also improved our compliance posture and reduced operational risk."

- VP of Operations

Manufacturing Industry - Global Manufacturing Company

A global manufacturing company was experiencing inefficiencies in their supply chain management, resulting in delayed order processing, inventory discrepancies, and customer dissatisfaction.

Our solution included:

- End-to-end automation of the order processing workflow
- Real-time inventory management and tracking
- Automated supplier communication and order placement
- Predictive analytics for demand forecasting

Results Achieved:

- **Processing Time:** -60%
- **Inventory Accuracy:** 98.7%
- **Cost Savings:** \$1.2M/year

"CognitBotz's supply chain automation solution has revolutionized our operations. We've seen dramatic improvements in efficiency, accuracy, and customer satisfaction."

- *Supply Chain Director*

More Success Stories

Explore how our automation solutions have helped organizations across various industries.

Healthcare Automation

Patient data processing automation with 70% time savings and 99.8% accuracy.

Financial Services

Account reconciliation automation saving 120+ hours monthly with 310% ROI.

Manufacturing Optimization

Supply chain automation achieving 85% efficiency gains and \$2.5M annual savings.
